FOR IMMEDIATE RELEASE

NEW YORK, New York (April 20, 2011) – ElectricWeb Communications announces the launch of their new website, TheElectricWeb.com. The website is designed for electrical contractors, project managers and purchasing agents.

The new website offers an easy-to-navigate platform that provides quick access to wide array of industry specific information, ElectricWeb exclusive products, and valuable information services. Users can check invoice pricing, search for new suppliers, browse manufacturer's websites, download product information and brochures, or just read the latest industry news.

In addition to providing classified job listings and a marketplace for contractors to buy and sell excess inventory, ElectricWeb users can watch streaming industry videos, use our online calculators, or just follow the latest copper trading in real time. TheElectricWeb.com is committed to providing everything a busy electrical contractor would search for on the Internet - and make it all available in one location.

About ElectricWeb Communications, LLC.

Located in New York City, TheElectricWeb.com uniquely fills the need of thousands of electrical contracting firms by providing valuable information they can immediately use to save time and money. The present ElectricWeb Network is a dynamic edition of the original ElectricWeb model created by Peter Coyne back in 1998. With more than 30 years in electrical industry as a supplier, as well as contractor, Mr. Coyne's knowledge and reputation is both well known and respected in the NYC electrical industry.
